Dear Sir:

Submitted herewith is a Petition to Make Special the above-identified patent application. The basis of this Petition is that the invention will materially enhance the quality of the environment.

In particular, the invention provides an enhanced scanning solutions module including a flow control subsystem; a detector subsystem coupled to the flow control subsystem; a dryer/moisture separator subsystem coupled to the flow control subsystem; a sampling subsystem coupled to the flow control subsystem; and a software control subsystem coupled to the flow control subsystem, the detector subsystem, the dryer/moisture separator subsystem, or the sampling subsystem. The module can include a sampling subsystem having: a sample loop; an absorbent trap; or a gas chromatography injection port. The module can further include an exhaust; a pneumatic supply; a power supply; a bypass module; a feedback signal; or a pressure control
